ConductRF: www.conductrf.com
ConductRF provides a broad array of RF Cable Assembly and Connector Solutions. RF Cables include High Frequency options up to 110GHz. With two independent ranges of RF Connectors covering commercial solutions including SMA, N, TNC etc and precision solutions including 3.5mm, 2.92mm and more. Custom solutions are available by request along with technical design support.

CPC Amps: www.cpcamps.com
Communication Power Corporation (CPC, founded in 1994) is dedicated to providing the highest quality RF amplifiers. Our products are designed for Military/Avionics, Tactical Comms, Medical, Laboratory and Industrial applications.

Innovative Power Products: www.innovativepp.com
Innovative Power Products designs and manufactures High Power 90 Degree Couplers, Directional Couplers, Dividers /Combiners, Resistors, Terminations, Baluns, Attenuators, and Custom Broadband Products for the RF and Microwave industries.

Passive Plus Inc: www.passiveplus.com
A manufacturer of high-performance RF/Microwave passive components, serving the Medical, Semiconductor, Military, Broadcast and Telecommunications Industries. PPI specializes in High-Q / High Power, Low ESR /ESL Capacitors, Non-Magnetic Capacitors

Polyfet RF Devices: www.polyfet.com
Polyfet RF Devices is a manufacturer of broad band RF power transistors and power modules. Our devices consist of Gallium Nitride, LDMOS, and VDMOS technologies processed using state of the art equipment.

WLM Components

Reactel: www.reactel.com
RF and Microwave Filters, Diplexers and Sub-Assemblies from DC to 50GHz. We offer tubular, LC, cavity, and waveguide designs, as well as state of the art high performance Suspended Substrate models.

Retronix: www.retronix.com
Retronix provides robotic hot solder dip and retin, BGA/LGA reball, PCB rework, component recovery of high value or hard to find parts, and counterfeit testing services.

QPAR USA: www.qparusa.com
Research, design & manufacture of Commercial-off-the-Shelf (COTS) & custom designed microwave antennas, subsystems and associated microwave components". Horn antennas, Omni-directional antennas, Sinuous antennas, Spiral antennas, Reflector antennas, Spinning DF antennas

STI-CO Antenna Solutions: www.sti-co.com
STI-CO® engineers and manufactures custom, mission-critical antenna & cable solutions. For over 58 years, STI-CO® has provided
mobile and tactical antenna systems for the military, federal, and homeland security agencies.

Synergy Microwave: www.synergymwave.com
Synergy Microwave manufactures low noise frequency sources including VCO's, DRO's, OCXO's, Saw Oscillators, and Synthesizers; and signal processing components including Mixers, Hybrids, Couplers, for Commercial and Military Communications.

WAVEPIA: www.wavepia.com
WAVEPIA delivers customizable semiconductor design solutions built on cutting-edge GaN on SiC technology. Our product range includes Bare Die and Packaged solutions that range from DC to 40GHz and 1W to 300W.
WAVEPIA Co., Ltd. designs and manufactures the best-in-class GaN-on-SiC transistors, MMIC (Monolithic Microwave Integrated Circuits), FEM (Front-End Module) and GaAs products.
